

17551.116 to adjournment. Present.

40024116
SUPERFUND RECORDS

John Savage from the Carolan Co. was present at the meeting. He read an article in the paper that they were running an unsafe plant. He believes they were unduly attacked about the subject as no one has contacted them about it. PCB's will not burn. That is why they are put in transformers. He read from the latest Federal register that PCB's do not pose any serious risks of injury to human health. He came to the meeting to answer any questions anyone might have. He said anyone can come and inspect the plant but they do have regulations to follow that someone from management will be there. They do have a safe business.

Williams asked if PCB was a cancer causing substance. Savage said yes.

Williams asked if it would get away and go down the ditch what effect would it have.

Savage said there would be no serious risks of injury. If it was spilled, the ground and everything would have to be picked up. They are responsible for cleaning it up.

Mayor said that our people came down on an informal basis. They only contacted the foreman and never the main bosses. He said the recommendation that we made should have been made to the bosses.

Woods asked what would happen if there was a structural fire.

Savage said that PCB's is in a totally isolated part of the plant. The rest of the building could burn and it would not effect this part of the plant. No heat or fire producing elements are in this part. It is always locked and never left open. It will burn at over 3000 degrees. It then turns to sulfuric acid.

Mayor thanked him for coming. He said that he and the council were responsible for the safety of the city and the ordinances say that we can come and inspect any business anytime, however, we do not intend to do so.

Savage said we do not have to let you in the door unless the management is there. They do want us to come but only if management is there to answer any questions.

September 23, 1982

The Honorable Donald Hancock
Mayor of ~~Holden~~
209 N. Vine
Holden, Missouri 64040

Dear Mayor Hancock:

As required by CFR Vol. 44, No. 106, Thursday, May 31, 1979, 761.10, Martha C. Rose Chemicals, Incorporated, PCB Division hereby notifies your office of its intention to begin treatment of polychlorinated biphenyls within thirty (30) days from receipt of this notification pursuant to 40 CFR 761.10 (e) (May 31, 1979, Codification) and Section 6 (e) of the Toxic Substances Control Act (TSCA).

We have met all of the requirements of the Environmental Protection Agency (EPA) who have inspected and approved our facility and operation as attested by the attached copy of the EPA letter of approval.

Sincerely,

Christopher B. Gosch
Director of Sales and Marketing

The Honorable Donald Hancock
Mayor of Holden
209 North Vine
Holden, Missouri 64040

Dear Mayor Hancock:

As required by CFR Vol. 44, No. 106, Thursday, May 31, 1979, 761.10, Martha C. Rose Chemicals, Incorporated, PCB Division hereby notifies your office of its intention to begin processing of polychlorinated biphenyl (PCB) capacitors beginning April 1, 1983.

This commercial processing of PCB's is under an interim approval from the U. S. Environmental Protection Agency, Region VII, and was granted based on the Agency's belief that there will be no risk of injury to health or the environment, and it provides PCB destruction equivalent to an incinerator (40 CFR 761.70) or high efficiency boiler (40 CFR 761.60).

Very truly,

Walter C. Carolan

The Honorable Francis Brillhart
Mayor of Holden
209 N. Vine
Holden, MO 64040

Dear Mayor Brillhart:

Pursuant to Section 6(e) of the Toxic Substances Control Act (TSCA) and 40 CFR 761.60(e) Martha C. Rose Chemicals, Incorporated, PCB Division, hereby notifies your office of its intention to begin processing for disposal Polychlorinated Biphenyl (PCB) transformers as an alternate disposal method at its facility located at 500 West McKissock Street, Holden, Missouri 64040 within thirty (30) days from receipt of this notification.

We have met all of the requirements of the USEPA who have approved our process as attested by the attached copy of our authorization.

Very truly,

Walter C. Carolan
